AT WAPTA, 5203 feet above sea level, midway between Lake Louise and Field in the highest Range of the Rockies, travellers will find a comfortable rustic bungalow camp. The camp is situated at the foot of Paget Peak on the north side of the lake opposite Hector Station, from which point connections are made by a small launch. Wapta is the most convenient starting point for pony trips to Lake O'Hara, Lake McArthur, Yoho Valley, Sherbrook Lake, etc. The regular bus service operating between Field and Lake Louise will pick up passengers leaving for either of these points, but reservations should be made in advance.

*Trip 1. LAKE O'HARA.* Situated seven miles off the beaten track, yet easily accessible by an excellent pony trail, lies picturesque Lake O'Hara. An excellent camp is maintained for the convenience of Trail Riders and Hikers and we strongly recommend an overnight stay in order that ample time may be had to explore Lake McArthur, whose blue waters are found at an altitude of 7,359 feet. This lake is noted for the Glacier which feeds it and frequently huge blocks of ice may be seen floating on its surface even in midsummer. On the return to Wapta the mountains present an entirely different aspect, and the ride is equally as interesting as the outgoing journey.

*Trip 2. YOHO VALLEY.* A delightful pony trip may be taken from this point into the famous Yoho Valley via Kicking Horse Canyon, offering magnificent views of Mt. Stephen, Cathedral Crags, Mt. Wapta and Spiral Tunnels. Yoho Bungalow Camp at the foot of Takakkaw Falls affords every comfort. This trip may be continued on to Yoho Glacier, and Twin Falls the second day, terminating at Emerald Lake on the third day after having crossed Yoho Pass.

*Trip 3. SHERBROOK LAKE.* A fascinating half-day pony trip may be made to this Lake from Wapta Camp. It affords an excellent opportunity for those desiring seclusion from the ordinary tourist traffic.

Private cars may be engaged at Wapta by any desiring this service for trips to Lake Louise, Banff, Field, Emerald Lake and other points of interest in the Rocky Mountains and Yoho Parks.

To the lover of nature, the wildflowers of these Parks will be a constant source of delight. Strange as it may seem, the flora of the higher altitudes is among the most beautiful in the world. Over 500 varieties have been identified in the Rockies, and their color, fragrance, and delicate loveliness add the last touch of enchantment to the region. While they grow in rich profusion in the valleys and on the lower slopes, it is on the Alpine meadows above timber line, where even the stubborn little pines and spruces have been driven back by the cold, that they are found at their finest.
